

IgniteTable by Hatch™

Observe and Assess Collaborative Learning with Ease

IgniteTable by Hatch™ is a collaborative and interactive table learning solution designed for kids to learn through play and for administrators of early childhood education programs to receive actionable data. It creates a dynamic and engaging environment for small groups of early learners, promoting collaboration, communication, and prosocial skills.

IgniteTable automatically captures authentic work samples, data, and visual and audio evidence of student interactions and behaviors in Hatch's educator dashboard, Insights™. This innovative feature allows educators to observe, record, and analyze student progress, relieving them from the task of administering assessments of child development, saving valuable time.

Revolutionize early childhood education. IgniteTable by Hatch™ is the key.

The Benefits of IgniteTable:

Fun, Collaborative Learning

IgniteTable creates a dynamic environment where young learners engage in fun and action-oriented games, fostering collaboration, communication, and essential prosocial skills.

Meaningful Observation

IgniteTable automatically captures data and evidence of student interactions and behaviors meaning less time observing firsthand.

Data-Empowered Educators

IgniteTable empowers teachers with real-time insights into collaborative learning experiences. This data informs offline instruction and enables teachers to communicate with families more effectively.

Elevate Your Early Education Program with IgniteTable!

IgniteTable by Hatch™ transforms early learning programs by creating an inclusive and engaging environment that nurtures collaborative learning, enhances child development, and prepares children for a successful future.

By utilizing IgniteTable, educators can focus on specific skill areas crucial for each child's success, providing targeted instruction and support and giving them the data they need. Say goodbye to time-consuming data collection and hello to a streamlined approach to the evaluation of development in each child.

"Hatch Early Learning is putting appropriate learning games in the hands of children."

Karen Peterson
Head Start Teacher
